

Notes re OC1 Champ race results:

In the majority of races, a backup timing system was operating. Thus, race organisers are confident that in the majority of races times are accurate from a time keeping perspective.

Race 8: Time for lane 1 (TEARIKIAUA, Darnell) not recorded. Apologies. This did not however have implications for the progression due to placing and anticipated time threshold for progression.

Race 12: Lane 4 impeded lane 3, as times were very close and decisive regarding progressions, it was decided to let Briar Barnsely race in lane 6 in the J16 Women's Final.

Race 22: Briar Barnsley was added in lane 6; her final time was 3.31.20 (a fourth place in this Final). It was not possible to record this result in the system and published race results; however, this placing is relevant for the ranking of paddlers for the selection for the Nationals 2010.

Race 26: Only the placings and time of the first place were recorded (before the computer crashed): 3, 2, 1, 5. Apologies. Paddlers were given the choice to re-race this heat; but affected paddlers decided to use their times posted in the Masters/O23 heats/races. Tanielu Evaga did not re-race but he came fourth in this heat and his time is unlikely to have met the progression time threshold.

Race 28: This race was re-run due to inconsistencies in the times published.
